PROFESSIONAL SUMMARY

7th-semester Informatics Engineering student at IIB Darmajaya, specializing in Mobile Development and Digital Forensics. Experienced across the full SDLC — from UI/UX design in Figma to development and QA — with hands-on project work in mobile applications, cybersecurity, and AR. Certified by HackerRank and Wadhwani Foundation, with proven leadership experience coordinating a community service field team.

EDUCATION

IIB Darmajaya | Bachelor of Informatics Engineering | **GPA: 3.84 / 4.00** | 2023 – Present

- Relevant Coursework: Advanced Mobile Programming, Software Engineering (RPL), Mobile & Digital Forensics, Computer & Network Security, Data Mining Algorithms, Augmented Reality, Software Quality Assurance, Intellectual Property (HAKI).

EXPERIENCE & PROJECTS

Group Leader — Praktik Kerja Pengabdian Masyarakat (PKPM)

- Led a student team through a community service program, coordinating field activities, task delegation, and communication with local stakeholders.
- Oversaw group planning, execution, and final reporting, strengthening leadership and cross-functional coordination skills outside a technical setting.

GPS Spoofing & Real-Time Tracker | Android Studio, Flask, Python

- Built a dual-function mobile application to both simulate GPS locations and detect spoofed GPS data.
- Developed a Flask-based backend to process real-time location data and flag coordinate discrepancies for forensic use cases.

Advanced Mobile Quiz Application | Android Studio, Figma, Java

- Designed a high-fidelity UI/UX prototype in Figma and implemented it as a full mobile quiz platform.
- Handled database integration and app state management as the major project for Advanced Mobile Programming.

Mobile Game Project | Android Studio, Java

- Designed and built a mobile game, implementing core game logic, UI, and interaction mechanics.

Cybersecurity Challenges | PicoCTF

- Solved multiple Easy–Medium level challenges across Cryptography, Web Exploitation, and Forensics categories, applying analytical and problem-solving skills in a competitive CTF setting.

Network Simulation & Security | Cisco Packet Tracer

- Designed and simulated secure network topologies, configuring routing protocols to ensure data integrity and efficient traffic flow.

Technopreneur | Wadhwani Foundation

- Applying Wadhwani Entrepreneurship frameworks for operations, financial planning, and customer growth.

TECHNICAL SKILLS

- Languages:** Java (Android), Python, PHP, JavaScript, SQL, C++
- Mobile & Interactive:** Android Development, Mobile Programming, Augmented Reality, Game Development
- Security & Forensics:** Digital/Mobile Forensics, GPS Spoofing Detection, Wireshark, Network Security, Phishing Analysis
- Software Engineering:** SDLC, Software Quality Assurance (QA), UML Design, Agile/Scrum Basics
- Tools:** Git/GitHub, Flask, MySQL, XAMPP, Figma, Cisco Packet Tracer, VS Code, Android Studio
- Data:** Data Science Fundamentals, Data Mining Algorithms, Statistics & Probability

CERTIFICATIONS & ORGANIZATION

- HackerRank:** Python (Basic), Java (Basic), Problem Solving (Basic) — 2026
- KOMDIGI:** Introduction to Digital Mindset — 2025
- Skill Academy by Ruangguru:** Data Analysis & Visualization — 2023
- Informatics Student Association (HIMA TI) Darmajaya** — (2023–2024)
